RESEARCH INTERESTS

Structural Geology and Basin Analysis. Numerical modelling and computation applied to Geosciences.

EDUCATION

Cornell University, Ithaca, New York USA **January 1998 - January 2003**

Ph.D. Earth and Atmospheric Sciences, January 2003

- Dissertation: Mechanical and kinematic investigations of fault propagation folding and fore-land subsidence
- Advisors: Richard Allmendinger and Teresa Jordan

Ohio University, Athens, Ohio USA **September 1995 - September 1997**

M.S., Geological Sciences, September, 1997

- Thesis: Thermomechanical modeling of the Llanos Basin, Colombia
- Advisor: Douglas Green

Universidad Nacional, Bogotá Colombia **September 1994 - September 1995**

Coursework M.S., Geotechnical Engineering, September 1994 - September 1995

Universidad Nacional, Bogotá Colombia **September 1988 - June 1994**

B.S., Geology, September, 1994

- Thesis: Structural Analysis of the Soapaga fault, Eastern Cordillera, Colombia
- Advisor: Andreas Kammer

PROFESSIONAL EXPERIENCE

Dept. of Energy Resources, University of Stavanger, Norway

Professor (since 2017)

October, 2008 - present

Courses taught: Structural Geology (Bachelor and Master), Geotechnical Engineering (Bachelor), Modelling and Computational Engineering (Master), Python for Natural Sciences and Engineering (PhD)

Center for Integrated Petroleum Research, Bergen, Norway

Researcher II

September, 2004 - September 2008

Fault Facies project, an initiative to realistically include faults in reservoir models. More information on this [site](#)

Norwegian Geotechnical Institute, Oslo, Norway

Postdoctoral fellow

August, 2003 - August 2004

Mechanical modeling of fault zones, rockslides, and fractured carbonates

Department of Earth and Atmospheric Sciences, Cornell University, Ithaca, New York USA

Postdoc

August, 2002 - August 2003

Field, kinematic and mechanical studies of fault propagation folding

PhDs

Charlotte Botter: Seismic imaging of fault zones (NFR 210425/E30). Graduated June 2016. Currently Teaching Fellow at the University of Leeds.

Luis Alberto Rojo: Impact of salt movement in the Triassic of the Nordkapp basin, Barents Sea (KD). Graduated October 2020. Currently at Aker-BP.

Jennifer Cunningham: From seismic interpretation to reservoir modelling of faults (KD). Graduated January 2021. Currently at Equinor.

Anaëlle Guillevic: Geothermal energy potential of the Norwegian North Sea (KD). Started November 2022

Daniele Blancone: Salt characterization and modelling for the future energy mix (NCS2030). Started January 2023.

Jake Butcher: Structural Geology and Geomechanics of the Wisting field, Barents Sea. Started May 2023.

POSTDOCS

David Oakley (PhD University of Pennsylvania): Structural uncertainty and stochastic structural modelling (KD). September 2020 to September 2022. Currently postdoc at The University of Edinburgh.

Nisar Ahmed (PhD UiS): Data driven ML methods for reservoir characterization (NCS2030). Started June 2024.

PUBLICATIONS

Conference abstracts not included

COMPUTER PROGRAMS

cdem: 2D discrete element modeling of geological structures (with Stuart Hardy, ICREA)
 Stereonet3D: Stereonet with 3D visualization (with Richard Allmendinger, Cornell University)
 GeoKalk: Structural geology calculator
 SSPX: Inverse strain modeling (with Richard Allmendinger, Cornell University)
 Trishear3D: 3D forward modeling of fault related folds
 Backstrip: Backstripping of sedimentary rocks
 Flex2D: 2D flexural modeling

These programs are for macOS and are available on my [website](#) and on the Mac App Store.

REPOSITORIES

[Matlab scripts](#) and [Xcode playgrounds](#) for Structural Geology and Basin Analysis available on my website. The Matlab scripts are also available in [this repository](#).

[Computational Geosciences](#): A book on Computational Geosciences with Python code included. I wrote this together with students, and as an educational project funded by the TN faculty.

[Python for Geosciences course](#): A 1 week Python course. This is part of a Python and ML for geosciences course funded by NFIP.

[Structural Geology](#): A collection of Jupyter Notebooks for Structural Geology.

[Energy Plots](#): Animations of the World's energy supply and demand. Data from the Statistical Review of World Energy, and animations made using Python.

[Curso de programación básica Python](#): A course in collaboration with Germn Prieto at the Universidad Nacional de Colombia. In Spanish.

ONLINE LECTURES

[Structural Geology YouTube playlist](#): Lectures from my Bachelor Structural Geology Course at the University of Stavanger.
